Correspondence

*ESR1* gene amplification in breast cancer: a common phenomenon? - pp806 - 807

* Reply to "*ESR1* gene amplification in breast cancer: a common phenomenon?" - pp810 - 812

HDAC2 deficiency and histone acetylation - pp812 - 813

* Reply to "HDAC2 deficiency and histone acetylation" - p813

Obituary

Giuseppe Attardi 1923–2008 - p814

Book Review

Blood-strong love - p815

News and Views

Shedding light on skin cancer - pp817 - 818

A new identity for the elusive intestinal stem cell - pp818 - 819

Bringing age-related macular degeneration into focus - pp820 - 821

Conflicting evidence on the frequency of *ESR1* amplification in breast cancer - pp821 - 822

Lung stem cells in the balance - pp822 - 823

Research Highlights

Research highlights - p825

Analysis

Systematic meta-analyses and field synopsis of genetic association studies in schizophrenia: the SzGene database - pp827 - 834

Brief Communications
Two newly identified genetic determinants of pigmentation in Europeans - pp835 - 837

Common sequence variants on 20q11.22 confer melanoma susceptibility - pp838 - 840

Estimating coverage and power for genetic association studies using near-complete variation data - pp841 - 843

Articles

NAD(P)H:quinone oxidoreductase 1 NQO1*2 genotype (P187S) is a strong prognostic and predictive factor in breast cancer - pp844 - 853

Integrating large-scale functional genomic data to dissect the complexity of yeast regulatory networks - pp854 - 861

A Gata6-Wnt pathway required for epithelial stem cell development and airway regeneration - pp862 - 870

Dishevelled controls apical docking and planar polarization of basal bodies in ciliated epithelial cells - pp871 – 879

Letters

Strong association of de novo copy number mutations with sporadic schizophrenia - pp880 - 885

ASIP and TYR pigmentation variants associate with cutaneous melanoma and basal cell carcinoma - pp886 - 891

Age-related macular degeneration is associated with an unstable ARMS2 (LOC387715) mRNA - pp892 - 896

Combinatorial patterns of histone acetylations and methylations in the human genome - pp897 - 903

Genomic surveys by methylation-sensitive SNP analysis identify sequence-dependent allele-specific DNA methylation - pp904 - 908

Mouse segmental duplication and copy number variation - pp909 - 914

Bmi1 is expressed in vivo in intestinal stem cells - pp915 - 920

Ras-MAPK signaling promotes trophectoderm formation from embryonic stem cells and mouse embryos - pp921 - 926

Corrigenda

Corrigendum: Prolyl 3-hydroxylase 1 deficiency causes a recessive metabolic bone disorder resembling lethal/severe osteogenesis imperfecta - p927
Corrigendum: Hypomorphic mutations in syndromic encephalocele genes are associated with Bardet-Biedl syndrome - p927

Corrigendum: Mutations in 15-hydroxyprostaglandin dehydrogenase cause primary hypertrophic osteoarthropathy - p927
