January 2007, Volume 8 No 1 pp1-108

Editorial

A matter of debate - p1

Commentaries

Organ-specific regulation of innate immunity - pp3 - 4
Eyal Raz

Conceptualizing immune responsiveness - pp5 - 7
Neil S Greenspan

On observing and analyzing disease versus signals - pp8 - 10
Rolf Zinkernagel

Friendly and dangerous signals: is the tissue in control? - pp11 - 13
Polly Matzinger

News and Views

Shigella rewrites host transcriptional responses - pp15 - 16
Guntram A Grassl & B Brett Finlay

DEteCTINg fungal pathogens - pp17 - 18
Catherine Dostert & Jürg Tschopp
Osteopontin-induced survival of T cells - pp19 - 20
Ingunn M Stromnes & Joan M Goverman

Trimming creates a new self-image - pp21 - 22
Julio C Delgado & Peter E Jensen

Research Highlights - p23

Perspective
Eric H Liu, Richard M Siegel, David M Harlan & John J O'Shea

Articles
Dectin-1 is required for beta-glucan recognition and control of fungal infection - pp31 - 38
Philip R Taylor, S Vicky Tsoni, Janet A Willment, Kevin M Dennehy, Marcela Rosas, Helen Findon, Ken Haynes, Chad Steele, Marina Botto, Siamon Gordon & Gordon D Brown

Dectin-1 is required for host defense against Pneumocystis carinii but not against Candida albicans - pp39 - 46
An injected bacterial effector targets chromatin access for transcription factor NF-kappaB to alter transcription of host genes involved in immune responses - pp47 - 56

Laurence Arbibe, Dong Wook Kim, Eric Batsche, Thierry Pedron, Bogdan Mateescu, Christian Muchardt, Claude Parsot & Philippe J Sansonetti

Kinase MEKK1 is required for CD40-dependent activation of the kinases Jnk and p38, germinal center formation, B cell proliferation and antibody production - pp57 - 63

Ewen Gallagher, Thomas Enzler, Atsushi Matsuzawa, Amy Anzelon-Mills, Dennis Otero, Ryan Holzer, Edith Janssen, Min Gao & Michael Karin

The kinases aurora B and mTOR regulate the G1–S cell cycle progression of T lymphocytes - pp64 - 73

Jianxun Song, Shahram Salek-Ardakani, Takanori So & Michael Croft

Osteopontin-induced relapse and progression of autoimmune brain disease through enhanced survival of activated T cells - pp74 - 83

Eun Mi Hur, Sawsan Youssef, M Edward Haws, Susan Y Zhang, Raymond A Sobel & Lawrence Steinman

Hematopoietic progenitor kinase 1 negatively regulates T cell receptor signaling and T cell–mediated immune responses - pp84 - 91

Jr-Wen Shui, Jonathan S Boomer, Jin Han, Jun Xu, Gregory A Dement, Guisheng Zhou & Tse-Hua Tan

HLA-DM targets the hydrogen bond between the histidine at position beta81 and peptide to dissociate HLA-DR–peptide complexes - pp92 - 100
Kedar Narayan, Chih-Ling Chou, AeRyon Kim, Isamu Z Hartman, Sarat Dalai, Stanislav Khoruzhenko & Scheherazade Sadegh-Nasseri

In the absence of aminopeptidase ERAAP, MHC class I molecules present many unstable and highly immunogenic peptides - pp101 - 108

Gianna Elena Hammer, Federico Gonzalez, Edward James, Hector Nolla & Nilabh Shastri
